

Document Preview Template

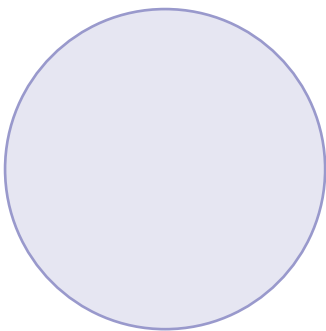

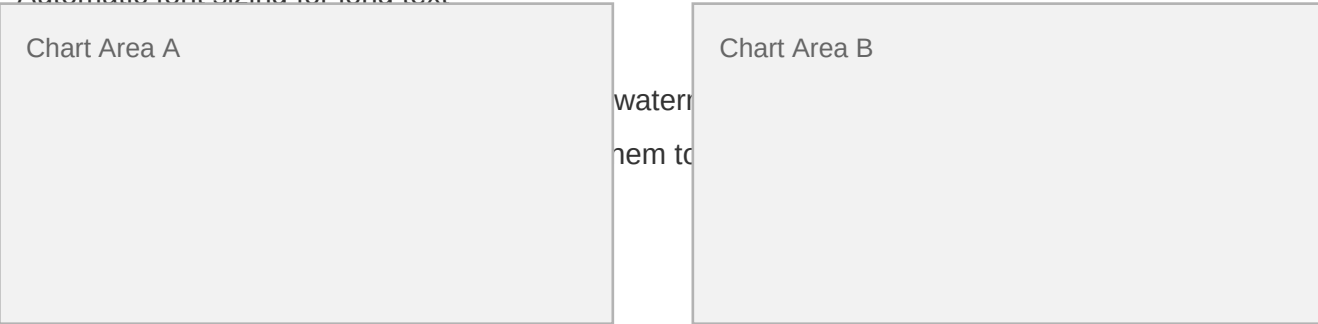

Sample Page for Watermark Preview

This is a sample document page used for watermark preview generation. It contains multiple paragraphs and formatting to simulate real-world usage.

When you add a watermark to your PDF, it will be overlaid on top of the existing content with adjustable transparency, rotation, and density.

The watermark system supports:

- Custom text in Chinese and English
- Adjustable opacity from 10% to 50%
- Grid-based density control (sparse to dense)
- Rotation angles for diagonal watermarking
- Automatic font sizing for long text
